---

Luis, David -

1. West Hills Neighborhood Council put TASC as a discussion item for their July meeting. Both David C and I told Chris Rowe that EPA would not be attending.
2. Staffers for Feinstein and Waxman want an update regarding our decision-making process on TASC. A call with them is set for July 23 at 2:30pm
3. Dan H called me today and asked for an update on TASC (probably because he saw the West Hills agenda item on this topic). I reiterated that TASC will not go to a single group and brought up the importance of "consensus on topics" from a cross-section of community members. He said that Chris Rowe is impossible to work with and represents Boeing's interest's not community interests. Therefore, in his opinion, you will not find a cross-section of community members willing to work with Chris Rowe.
4. I am going to write up some bullet points that combine ideas Luis's last email but with the importance of putting this back on the community (and not EPA) to sort out.

Luis, have you discussed this issue with the TASC Program Manager in DC?

I will get you, David and Nicole, my draft bullets later today. The final version of these bullets can be used for our call with the congressional staffers and emails to all interested "applicants" on this topic, and our announcement on this topic at the July 29th Inter-Agency work group.

Craig
